Hi Steve, I have been on the road the last 2 weeks so I was unable to do anything w the packer equipment at the whse if ya dropped it there. I am in town this week for at least 2 days, hopefully? I will do my best to get to the equipment and figure out what we need to do to test it. My schedule is a bit hectic this week as my wife's father is sick in Iowa and my wife is there w him, I am a single parent this week w limited free time.

Russ, their office at 13th and Sherman. If you want to come down on the train to Union Sta, and we'll go up the mall and head to the office or I'll get a gov.

On the phone now but let's talk.

Steve

Sorry! should clarify Bruce is your office at the same location as Allens near downtown Denver? Sent from my Verizon Wireless 4G LTE Smartphone Bruce Stover - DNR <bruce.stover@state.co.us> wrote:
Russ, I should be in by 2pm. Will that work for you to come get the packer set up?

Steve, I looked at GK today.... Discharge looked very low for June, maybe 10 to 15gpm? Will send pix tomorrow. I wonder if it's blocked up? I think Todd's arches are maybe gonna be too big- maybe three or so for portal shed. I saw them laying down at the yard at Gladstone. Rock will be

encountered within 25 feet but it's all fractured, blocky, loose bad ground.

Steve, I left both of the 2" inch packers and nitrogen regulator with tool box and parts, tuning hoses etc. In Allen's office at 1313.

I'm Heading down to the Carbonero today and will be back Thursday afternoon and all day Friday if you want to check it all out.

I will forward the pix.

Bruce,

I heard today that you may have some of the packer units that we could borrow for RnB work. Let me know when and where that we might be able to look them over, and possibly do a pressure test on them.

Depending on timing, it end up being Russ and not me (Russ's look is more important than mine.)

Thanks,

Steve
